

Role Mining Addon

How to install Soffid Role Mining:

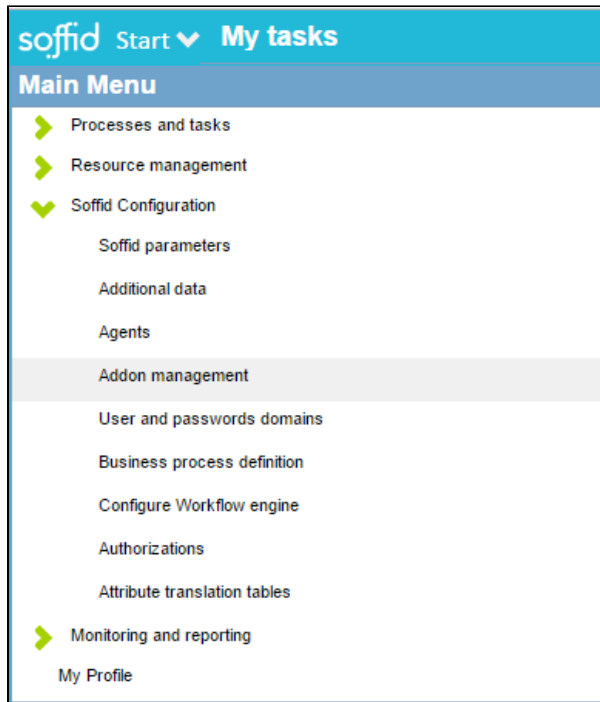

- First of all, download the latest version of Role mining from here:

<http://www.soffid.com/download/enterprise/>

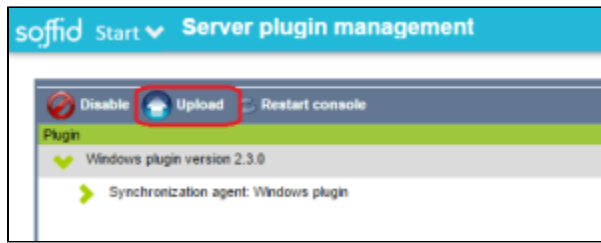

Download the latest's Role Mining version.

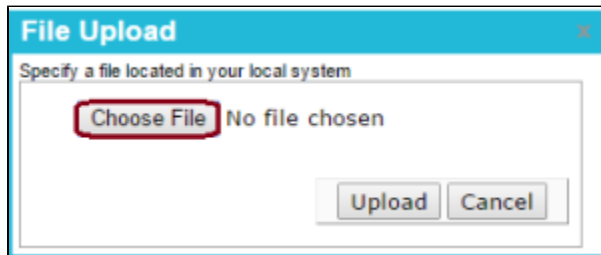

- Log in your SOFFID IAM Server. Go to *Main Menu* *Soffid Configuration* *Addon management*. Afterwards, click *Upload* and select the folder where jar file is located.

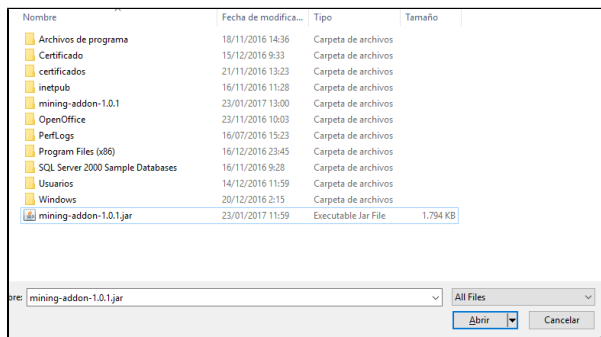

Addon management.

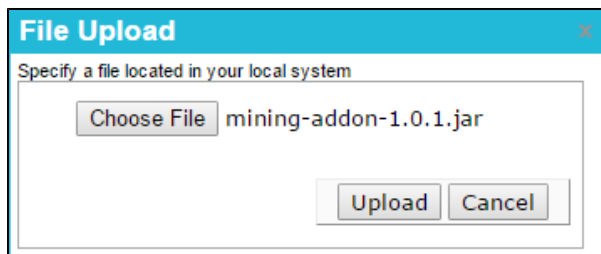

Upload button.

Choose file

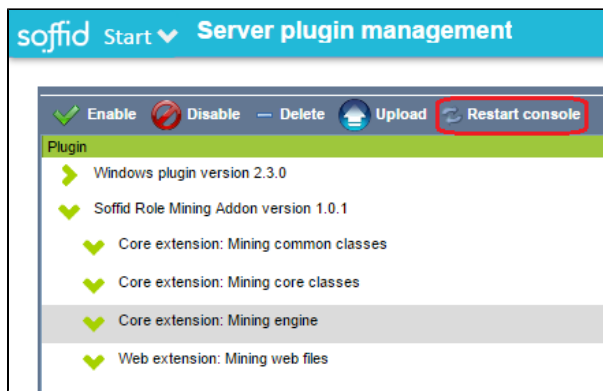

Choose jar file from the folder.

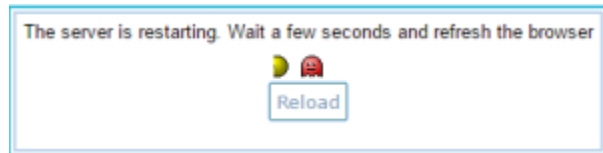

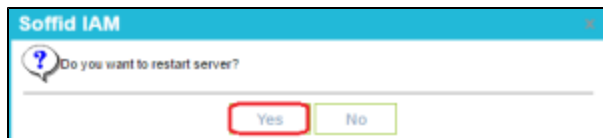

Upload the jar file.

- You will notice that there is a new plugin installed in your SOFFID IAM server. In order to make all modifications effective, restart IAM Console by clicking in the button above. It will take a while. Afterwards, log out and log in your SOFFID IAM server.

Restart console

- ☑ Finally, restart Soffid Sync Server Service. Click in *Start button Monitoring and reporting System monitoring*. In the Soffid Syncserver status, under the status column, click the circular arrows button.

System monitoring.
